

Stroke Prediction Using Machine Learning

Output Screenshots

1.

```
measure_precision_recall(predStacking, testY)
```

Results
precision: 92.12%
recall: 94.82%
f-measure: 93.45%

2.

```
# defining KNN  
knn = KNeighborsClassifier(n_neighbors=10, metric="minkowski", p=1)
```

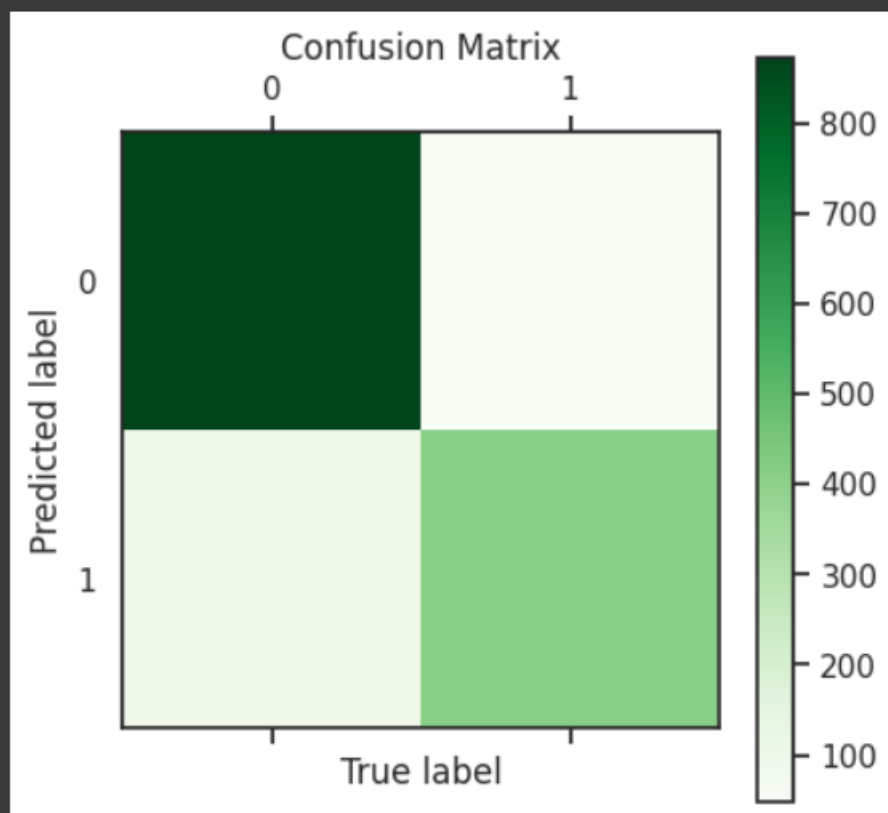

+ Code

+ Text

```
knn.fit(X_train_scaled,trainY)
```

▼ KNeighborsClassifier
KNeighborsClassifier(n_neighbors=10, p=1)

```
measure_precision_recall(predKnn, testY)
```

Results
precision: 89.50%
recall: 81.31%
f-measure: 85.21%
